

DATA Engineer

REMOTE - CONTRACT

PRESENTED TO YOU BY i-RECRUIT

Overview

Our client helps companies transform their data into revenue and growth. Operating at the cutting edge of technology, they deliver advanced analytics solutions including machine learning and AI technologies to help companies understand and predict customer behaviour.

A diverse, tolerant and supportive workplace - applications are welcome from women, ethnic minorities, members of the LGBT community, people with disabilities or any other sector of society who have suffered, or continue to suffer, discrimination.

We are currently looking for a Data Engineer with strong architecture skills to join a growing team.

The role is working with our client who is a global biotechnology leader focusing on Therapeutics and Drug discovery. You will be part of a Datateam that are working on a scientific mission designing, developing, and supporting a cloud-based scientific software environment and infrastructure for data collection, integration, and analysis.

Responsibilities

The successful candidate will collaborate with cross-department scientists and data professionals to enable the discovery and development of novel medicines.

Strategically develop comprehensive data architectures that match the client's scientific strategy and vision.

Implement and maintain pipelines processing complex scientific data.

Ensure structured and unstructured data and metadata is optimised for downstream use cases enabling core scientific capabilities.

Requirements

- At least a BS degree in Computer Science, Information Sciences, Engineering, Mathematics, or related field.
- At least 3 years of experience in data engineering.
- Demonstrated impact designing and implementing solutions (Cloud solutions preferred).
- Preferred: Experience working with a cloud-based data integration platform such as Snowflake, Databricks or Palantir's Foundry software.
- Preferred: Experience supporting a core drug discovery scientific discipline (chemistry, biology, and/or clinical).
- History of working successfully in a fast paced and rapidly growing cross-functional environment.
- Outstanding written and verbal technical communication skills.
- Ability to communicate effectively in English, the shared language of our multicultural team.

You will be comfortable integrating into a project in a new company quickly You need to be eligible to work in Ireland, but can be based elsewhere in the EU

The Package

You wouldn't expect us to disclose the rate at this early stage, but we're very confident that we'll meet your expectations.

The position is on an initial contract basis for 9 months with a strong likelihood for extensions into multiyear renewals.

Next...

If we've piqued your interest, we'd be happy to answer any questions that you may have. If you are happy to be considered, we'll need a CV, and after that, there'll be an informal chat.

If both parties are happy, you will be introduced to the client to discuss the position in more detail.

And if it all goes well...welcome to your new job.

A bit about us

We have decades of experience of recruitment, business and commerce, and it shows. Trading since 2018, we're an independent and proud Irish company, working across Bulgaria, Ireland and the UK. We have developed some very smart techniques for finding key staff for our portfolio of clients. It can be hard and laborious work, but it's really effective.

But you know that already, or you wouldn't be sitting there, reading this.

We treat our candidates with a great deal of respect, and because of this, we develop strong relationships with our ever-increasing database of talent.

We never forget that we are dealing with people who are making life changing decisions. We'd be *delighted* to help you on to the next stage of your career.
